Enable non-history based features to work without WAA

Chris Ruemmler

This is a strange way to word this. I'd instead state something like WAA is only used for Web History and App Usage History (used Gmail @ time, used Uber @ time, etc.). Given Web History and App Usage are already launched, I don't see any new uses for the WAA control bit.

Change WAA-off logging from Zwbk → GAIA-temp Consistency across Search, Maps, Ads, Assistant

Heradon Douglas

Please explain. What logs/products is this meant to affect?

Divya Sharma

The goal is to make the change across all backends where we write to Zwbk when WAA is off. Other than Clearcut, currently we are working with different teams in GWS, Assistant Server, Boq, Search ads to finalize the details. [go/change-waa-logging-design](https://change-waa-logging-design) lists these backends

Chris Ruemmler

Isn't WAA off supposed to NOT log at all? At least that is what is implied from the WAA page: <https://support.google.com/websearch/answer/54068?co=GENIE.Platform%3DDesktop&hl=en>

So, if WAA is off, how are we able to log at all?
